

Please permit XM radio to continue providing continuous updates of traffic and weather. I live in the Washington, DC area and it has already saved me travel time and money by avoiding traffic jams. Regular radio, AM and FM, at the most provide traffic updates at 10 minute intervals and at the rate of traffic on major roads and interstates, you can get into a whole lot of trouble in 10 minutes. Regular radio is also free to the public; I pay for the service I am getting. Seems to me there should be a difference in how free radio and paid should be treated. Also, I have not heard of WMZQ trying to stop WBIG from broadcasting news and weather.

Thanks.
